Development

Inquiry

Vildagliptin is an adamantane derivative that is one of the new class of dipeptidyl peptidase 4 inhibitors. It is antidiabetic (Type 2 only) and has been approved in the EU since 2008. The active ingredient has a clear advantage over the old-known. Hypoglycaemia is rare, but the body's insulin secretion still needs to function to a certain extent.

Description

Formula

$C_{17}H_{25}N_3O_2$

Molecular weight

303.40 g/mol

Molecular size

small

Controlled Substance

no

Precursor

no

Indications

Drugs used in diabetes
