

Ambroxol hydrochloride

CAS

15942-05-9, 23828-92-4

Status

Commercial

[Inquiry](#)

Ambroxol hydrochloride is a halogenated aromatic compound bound to a cyclohexanol. The substance reduces viscosity peribronchial glandular secretions. In addition, it accelerates the ejection of the mucus (mucociliary clearance) and reduces the symptoms of the disease through antioxidant, anti-inflammatory and analgesic effects. Therefore, Ambroxol is used in the treatment of acute and chronic respiratory diseases, as well as sore throat.

Description

Formula	$C_{13}H_{18}Br_2N_2O \cdot HCl$
----------------	----------------------------------

Molecular weight	414.56 g/mol
-------------------------	--------------

Molecular size	small
-----------------------	-------

Controlled Substance	no
-----------------------------	----

Precursor	no
------------------	----

Indications	Cough and cold preparations
--------------------	-----------------------------
