

# Levetiracetam

## CAS

102767-28-2

## Status

Commercial

## Inquiry

Levetiracetam belongs to the group of Piracetam derivatives. The active substance reduces the release of glutamate in the synaptic cleft, which impairs the transmission of stimuli. It is used for the treatment of focal seizures, Janz syndrome and in idiopathic generalized epilepsy.

## Description

**Formula**  $C_8H_{14}N_2O_2$

**Molecular weight** 170.21 g/mol

**Molecular size** small

**Controlled Substance** no

**Precursor** no

**Indications** Antiepileptics
