

Milrinone

CAS

78415-72-2

Status

Commercial

Inquiry

Milrinone belongs to the group of carbonitrile derivatives of amrinone. The active substance leads to vasodilation and increased cardiac contraction force. It is used for the treatment of heart failure.

Description

Formula	C ₁₂ H ₉ N ₃ O
Molecular weight	211.22 g/mol
Molecular size	small
Controlled Substance	no
Precursor	no
Indications	Cardiac therapy
