

Ondansetron hydrochloride

CAS

99614-01-4, 103639-04-9

Status

Commercial

[Inquiry](#)

Ondansetron hydrochloride is a drug that selectively acts as an agonist on 5-HT₃ receptors (serotonin receptors). If the cell death of serotonin-rich cells is triggered by radiotherapy or cytostatic therapy, the vomiting center is activated. Ondansetron blocks this reaction and can therefore be used as an antiemetic in tumor therapy. It is also effective in postoperative vomiting. The current data suggest that it also could be used for maternity sickness.

Description

Formula	C ₁₈ H ₁₉ N ₃ O • HCl
Molecular weight	329.82 g/mol
Molecular size	small
Controlled Substance	no
Precursor	no
Indications	Antiemetics and antinauseants
