

Trospium chloride

CAS

10405-02-4

Status

Commercial

[Inquiry](#)

Trospium chloride is a tropane derivative (3 α -nortropanol benzene acid ester) and an anticholinergic (antispasmodic) agent. This is used to treat urge and reflex incontinence (e.g. overactive bladder). This is achieved by the competitive blockage of acetylcholine on their receptors. This inhibits the parasympathetic influence, smooth muscles, heart muscle and parts of the peripheral nervous system.

Description

Formula $C_{25}H_{29}NO_3 \cdot HCl$

Molecular weight 427.96 g/mol

Molecular size small

Controlled Substance no

Precursor no

Indications Drugs for functional gastrointestinal disorders
